CHRISTMAS, 1909.

Christmas, 1909, is now in the past, but our people have cause to feel proud of the manner in which it was celebrated. On the day before Christmas the B. & O. and K. & M. (no steamboats running on account of ice) railroads landed vast crowds of ladies, gentlemen and little children, in our thriving little city, and soon our various places of business were thronged with purchasers.

It is a conceded fact that there was less disorder these holidays than for many years. Very few arrests were made, and the police say they had no troubles worth mentioning. The townspeople wish every visitor a happy and prosperous year in 1910.

Sealsipt Oysters

Are the Standard of Oyster Value Your dealer cannot buy an oyster as good as Sealsipt for any less money. If you buy at less than Sealsipt prices, the quality is lacking.

Don't be imposed upon. Tin-can oysters are Not Sealsipt Oysters. Some people have been misled into thinking oysters put up in tin cans are Sealsipt oysters. Such is not the case. Sealsipt oysters are never shipped or sold that way.

We want our customers to know the truth.

Tin cans are filled at the coast by shippers who are not bound by a contract of any kind to fill the cans with solid, unwatered oysters. These dealers are under no restrictions. Responsible to nobody. In the majority of cases, watered oysters are used. Often a liberal supply of water is added by the jobber after they reach him. Sealsipt Oysters are sold by us exclusively, because they are honest oysters. Air-tight containers are packed solid with oysters AT THE SEASIDE—and SEALED. Ice is kept packed around these containers during the entire journey, but no ice or water ever touches the oysters.

There is no railroad ice "liquor"—nothing but solid oysters.

Our customers say Sealsipt Oysters TASTE the same and ARE the same as oysters eaten at the shore. Try them yourself and be convinced.
